PROFESSIONAL SUMMARY

Aspiring Data Scientist skilled in Python, SQL, Machine Learning, and Deep Learning, with hands-on experience building classification models for fraud detection, disease prediction, and image recognition using Scikit-learn, TensorFlow, and Keras. Proficient in data preprocessing, feature extraction, and model evaluation, with a strong ability to translate data into actionable insights. Committed to continuous learning and growth in the data science field.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Object-Oriented Programming (OOP)
- **Machine Learning:** Supervised Learning, Model Evaluation, Scikit-learn
- **Python Libraries:** Pandas, NumPy, Matplotlib
- **Database Management:** MySQL
- **Tools & Platforms:** Jupyter Notebook, VS Code, Google Colab
- **Technical Course :** Completed a Data Science course at Palle Technologies, Bangalore.

PROJECTS

Fake Job and Internship Detection System Using Machine Learning

- Built a Chrome extension using Python, FastAPI, Uvicorn, Scikit-learn, and Pandas to detect fraudulent job and internship postings in real time, with a REST API backend for model inference.
- Applied data preprocessing, feature extraction, and text vectorization (TF-IDF) techniques, then trained classification models (e.g., Logistic Regression/Random Forest) to generate fraud probability and trust scores.

Diabetes Prediction Using Machine Learning

- Built a machine learning model using Python, NumPy, Pandas, Scikit-learn, and Matplotlib to predict diabetes risk from patient health data.
- Evaluated multiple classification algorithms (Naive Bayes, Random Forest, KNN) and selected Random Forest for deployment based on the highest accuracy achieved.

Shoe Brand Classification Using CNN (Nike vs. Adidas)

- Built a Convolutional Neural Network using Python, TensorFlow, and Keras on Google Colab to classify shoe images as Nike or Adidas.
- Designed a CNN architecture with multiple convolutional and pooling layers using ReLU and Softmax activation functions, and trained it with the Adam optimizer for improved performance.
- Used NumPy for numerical computation and PIL for image preprocessing; achieved 98% accuracy with a loss of 0.2 on the classification task.

EDUCATION

Bachelor of Technology in Information Technology

Info Institute of Engineering, Coimbatore

CGPA: 7.8

2022 – 2026

Higher Secondary Education

Govt Boys Higher Secondary School, Dharmapuri

Percentage: 63.6%

March 2022

SSLC

Govt Boys Higher Secondary School, Dharmapuri

Percentage: 72.4%

March 2020

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Professional Service Director

Rotaract Club of Covai

2025 – 2026

GDG on Campus

Data Analyst, Core Team Member

2025 – 2026
